EMpower
Activation Manual

1.Start EMpower

- ○ Click the EMpower shortcut icon (Windows / Mac Operating System)

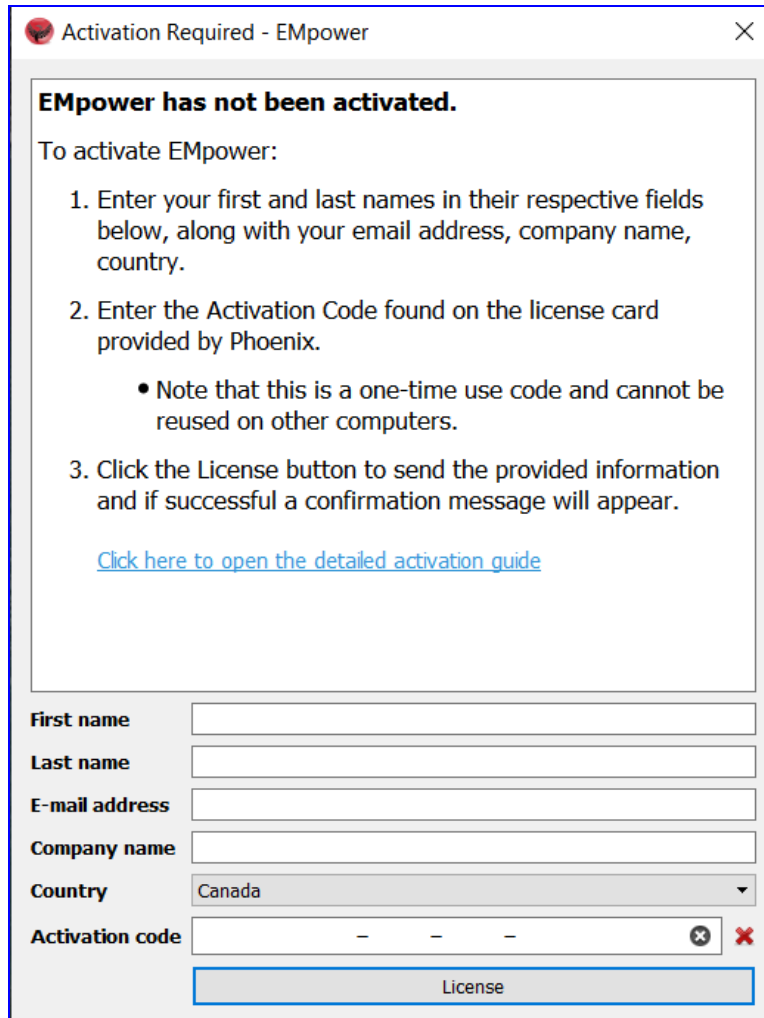

- ○ In Linux, run the empower.sh script in the EMpower installation directory
- ○ The text "Unlicensed" will appear at the bottom of the EMpower window

- ○ Click on the Manage button

2. Complete the information

- The following window will appear if your EMpower copy is not licensed yet. Complete the information in the form.

- Enter the **'Activation Code'** (from the license activation card)
- After typing the activation code correctly, the icon changes from ❌ to ✔

3. Recommendation

- ○ Write the Computer Name on the back of the card using a permanent marker.
- ○ Keep the EMpower license card in a safe place; this information will be necessary if you need to re-install EMpower in the future.
